UTKARSH SINGH

SOFTWARE ENGINEER | .NET BACKEND & AZURE CLOUD

9807781245 • singhutkarsh224@gmail.com • Portfolio: https://utkarsh0504.github.io/

• LinkedIn: linkedin.com/in/utkarsh-singh-5039b7153/

PROFESSIONAL PROFILE

Results-driven Software Engineer with nearly 6 years of experience specializing in enterprise .NET modernization, cloud architecture, and high-performance database solutions. Proven track record in upgrading legacy architectures to .NET 10, executing seamless Azure cloud migrations, and optimizing mission-critical API workflows. Key contributor to complex onboarding automation and digital transformation initiatives that deliver significant operational speed and business value.

TECHNICAL SKILLS

Backend & Frameworks: C#, .NET 10, .NET 6, ASP.NET / Web API, .NET Framework, Entity Framework Core, LINQ, VB.NET

Azure & Security: Microsoft Azure, Azure cloud services, Application Insights, Azure Key Vault, federated identity and token flows, user management

Data & Automation: SQL Server, T-SQL, stored procedures, scalar functions, JSON-driven imports, PowerShell

Frontend & Tooling: Angular, JavaScript, ASP.NET Web Forms, Azure DevOps, Git, GitHub, Visual Studio, Postman, SonarQube

PROFESSIONAL EXPERIENCE

First American India | Software Engineer — Jan 2021 – Present

Azure Cloud Migration & Application Modernization — Jan 2026 – Present

- Upgraded existing enterprise .NET projects to .NET 10 while retaining established business functionality during application modernization.
- Architected and deployed upgraded .NET applications to Microsoft Azure, driving cloud transformation from legacy hosting environments.
- Strengthened security posture by implementing federated identity tokens, modern authentication flows, and fine-grained user access management across cloud services.
- Enhanced system observability and reduced incident resolution time by integrating Azure Application Insights for proactive real-time telemetry and monitoring.
- Secured sensitive application parameters and secret management across cloud environments by integrating Azure Key Vault.
- Modernized frontend architecture by leading the upgrade of client applications from Angular 19 to Angular 22, boosting rendering performance and user experience.

Lender Launch | SQL Development — Jan 2024 – Dec 2025

- Engineered high-performance T-SQL stored procedures and scalar functions, streamlining the onboarding of financial institutions onto the RISE platform.
- Designed structured, automated JSON-driven SQL import workflows to seamlessly migrate complex lender configurations, contacts, and operational rules.
- Automated manual setup operations using robust T-SQL scripts and PowerShell orchestration, eliminating operational bottlenecks.
- Coordinated cross-functional alignment across 3 global time zones, maintaining operational continuity throughout major deployment cycles.

- Accelerated time-to-market by driving down lender onboarding cycle time from several weeks to 1 week, dramatically speeding up client deal readiness.

Paid Project | Web API & Background Services **Oct 2022 – Jan 2024**

- Built high-throughput .NET 6 Web APIs and background services leveraging EF Core to power automated document-registration pipelines.
- Developed intuitively designed administrative web modules using JavaScript and VB.NET Web Forms, enhancing operational efficiency for maintenance teams.
- Optimized execution pipelines to slash document processing time by 66% (from 15 to 5 minutes), consistently exceeding strict SLA benchmarks.

Closing Engine | Canada Insurance Document Processing **May 2021 – Oct 2022**

- Designed and delivered 30+ complex, data-centric document generation templates for Canadian insurance operations using C#, .NET Framework, and SQL Server.
- Participated across full end-to-end SDLC phases—design, development, testing, and continuous deployment—within an Agile/Scrum team environment.
- Championed code quality, reducing SonarQube technical debt issues to 2% while increasing test coverage to 75.3% across core services.
- Mentored 5 junior engineers and coordinated project deliverables across a 50-person delivery organization spanning 3 departments.

AWARDS & RECOGNITION

- Top Performer Award — Honored in Q3 2021, Q2 2022, Q2 2025, and Q3 2026 for rapid onboarding and consistent high-impact product deliveries.
- Extra Miler Awards — Recognized in May 2023, November 2023, October 2024, and September 2025 for demonstrating exceptional dedication and exceeding project goals.
- Rising Star Nominee — Nominated as a Rising Star in 2021 for high-quality engineering standards.
- Employee of the Year Nominee for 2026 — Nominated for ongoing outstanding contributions and client commendations.

EDUCATION

Bachelor of Engineering, Computer Science & Applications | GLA University, Mathura | Jun 2016 – May 2020

Higher Secondary Education | Navayuga Radiance School, Lucknow | Jun 2014 – Apr 2016
